WORK EXPERIENCE

Head of Engineering
Deltacron

09/2021 - Present

As the Head of Software Engineering at Deltacron Business Technologies, I lead the entire software development lifecycle for projects, ensuring the delivery of high-quality software solutions. My responsibilities include leadership and team management, technical expertise, client collaboration, quality assurance, and innovation & strategy.

Achievements/Tasks

- Worked on several products, including Datacakes, Narchie, RSVLTs, and Kleta, among others.
- Created and implemented design plans.
- Reviewed code regularly for accuracy and functionality.

Fullstack developer
Welltime Ltd

05/2013 - 08/2021

Achievements/Tasks

- While working at Welltime Ltd in the UK, I worked on six products.
- My tech stack included React Native, Node.js, C#, SQL, MongoDB, Stripe, and Firebase.
- Notable products include Dental Diary, RemoteForms, LabConnect, and Gyftmoni.

.Net Developer
Precise Technology Consultants

12/2012 - 04/2013

Achievements/Tasks

- Managed three products.
- Stack includes C#, WPF, SQL and Firebase.
- Notable products are Laser Vision, Noble ForEx Exchange, and Pak Canadian Exchange.

EDUCATION

MS Computer Science
University of Engineering & Technology, Peshawar

09/2013 - 05/2018   3.67

BS Computer Science
University of Engineering & Technology, Peshawar

06/2012   3.71

PROJECTS

Datacakes AI (01/2024 - 05/2024)

- Datacakes is a lightweight SaaS platform for data owners who want to share the power of their insights, while keeping raw data private.
- Role: Leading the frontend development in React.js, refactoring and standardizing the codebase, implementing the Cypress test suite.
- Tech Stack: React.js, Tailwind CSS, Cypress, Hotjar, and Material UI.

Kleta (03/2022 - 01/2023)

- Kleta e-commerce migration to a modern stack and mobile app revamp.
- Role: Leading a team of four engineers, fullstack development, and payment gateway integration.
- Tech Stack: Headless commerce build using Next.js, Ninox (CRM), Node.js, Google Analytics 4, React Native Mobile App, CityMapper integration, and Stripe.

Narchie (07/2021 - 01/2022)

- Narchie is the social marketplace for homeware. Where decor enthusiasts can buy, sell and connect.
- Role: Mobile app development (React Native) and API integrations.
- Stack: E-commerce platform using React Native, Redux, Firebase (Firestore, Storage, Cloud functions), Algolia and Sendbird.

Dental Diary (04/2018 - 08/2021)

- Dental Diary is a platform for dentists and patients to book and manage appointments using R4 as the database.
- Tech Stack: Appointment booking platform using React Native (mobile app), React (web frontend), C# (backend), SQL (database for customers), R4 (appointment management system), and Stripe.
